

MUSICAL JOURNEYS

Music Production Course - level 1

This is a one of its kind course in India that focuses on teaching writing, recording, producing to aspiring singer songwriters, DJ /Producers, Beatmakers and content creators. The only course in India that takes you from scratch to your first album ready to be released.

At the cost of recording a single song at a studio you'd be able to make your first album yourself and keep making music for the rest of your life for an unlimited number of songs.

Write, record & release your own songs. Take a step towards your musical dream now.

By the end of the course you would be able to:

- Navigate Ableton software comfortably
- Understand and create your own songwriting process
- Write, record, edit and release your own original music
- Create a groove/beat and drum patterns
- Write lyrics
- Write instrumental parts for your music
- Arrange songs in different genres
- Create chord progressions for your original music
- Do basic sound design and mixing for your music
- Add audio effects to add flavor to your music
- Creating engaging hooks and melodies

Average music production course in India	Musical Journeys Methodology
No real way to measure student success and progress	3 Tracks at the end of the course- Your First EP- Real Way to measure progress and success
Busy or disinterested teachers	A passionate educator with years of experience in curriculum building and teaching 1000s of students and teachers across the sub continent
Focus on learning software/ technique & very little focus on songwriting and bigger picture	Balanced approach with focus on software, songwriting skills and arrangement skills
Not enough personal support	1 Start to Finish- Private Production session each month outside of weekly group classes
Outdated teaching methods	Blended learning methodology- Supported by online content- Focus on real application of knowledge
High drop out rate and low productivity rate	Active student participation and learner ownership by making sessions fun and engaging and project led approach
Limited access to gear and learning content	Access to a rich library of learning content and tools to make keep making music and lifelong learning
Lack of structure in the learning process	Well researched course content and curriculum structure inspired by the best in the world like Ill Gates -Producer Dojo , Timbaland etc
No real network access and post course support	<p>The founder is the head of one of the fastest growing music companies in India</p> <p>Connections with film and content industry and Guest lecture from the industry experts</p> <p>Arts and entrepreneurship session at the end of the course</p>

The course follows a blended approach the only one of its kind in India, where the focus is not just on learning the software like most of the music production schools in India but actually finishing tracks. After two years of research and development and studying gaps in the music production programs across the country, we have created a methodology that guarantees creative success for all our students

This course and its methodology has been designed by a highly experienced educationalist who has worked with Indian and Afghanistan government as a consultant to improve their respective education system. As part of the course you get access to online and offline learning content worth more than Rs 1,00,000.

Syllabus

The first of its kind curriculum in India that gets you to finished tracks and albums.

After years of research and experience, our team has built a path breaking of learning music production. Our flagship curriculum "XpressMethod" gets you to finish songs and letting you set the right momentum for musical success. Inspired by the best producers and best practices from psychology of learning and arts, we have created a unique curriculum that puts focus on all the aspects of writing, recording and producing music. It's going to be hard to find a methodology that cuts through the bullshit rules (BRULES) and get your straight to creative success.

Tools of creation- Ableton | Navigating Live | Recording in live | Editing | Audio recording fundamentals | Midi Recording | Warping | Arrangement & Session View Editing | Making beats and grooves | Producing with Synths | Working with effects | Vocal tuning and processing | Creating workflow and templates | Equalization | Intro to live instruments | Intro to synthesis | Using samples and loops |(Sampler and simpler) | Midi Effects | Working with racks | Mixing techniques | Limiting and mastering

Basics of Songwriting, arrangement and production

Part writing- guitars, keys, bass, drums etc
